

High Tech Laser Australia Presents

The Definitive Laser Dentistry Course

Presented by Professor Laurence Walsh

This one day course will educate you on the latest technology available to perform minimally-invasive dentistry. Professor Walsh will outline the benefits of laser technology and educate you on the practical uses of lasers in your practice.

Lasers in Theory

- Clinical applications in dentistry
- Laser wavelengths and tissue interaction
- Introduction to laser physics and safety
- Treatment presentations:-
Cavity preparation, laser teeth whitening and soft-tissue surgery

Lasers in Practice

- Try the lasers for yourself and meet existing users
- Try the Fidelis III- the world's fastest dental laser
- Try Diode and KTP lasers in soft tissue
- See Smartbleach® - unique photo-chemical teeth whitening
- Learn about PAD (Photo-Activated Disinfection) clinical disinfection for caries and endodontics

See the widest range of dental lasers in Australia
