

I've got a secret...

It's about the DOT!

DOT
THERAPY

"DOT Therapy is the new gold standard in laser facial resurfacing. What makes DOT Therapy so special is its range of options. My patients are thrilled that we can customise the treatments to meet their exact skin requirements. The results are extraordinary and the downtime is so minimal that my patients can receive a treatment on a Thursday and be back to work on Monday looking radiant."

Deborah Sarnoff, M.D.

**Associate Clinical Professor of Dermatology at
New York University's School of Medicine**

Introductory Offer - Only \$75,000+GST before 30/6/08!

The secret is out - It's about the DOT!

The SmartXide DOT laser with DOT Therapy is ideal for the treatment of dyschromia, skin laxity and texture, wrinkles, dermal lesions, photoaging, acne scarring and scar reduction.

DOT Therapy is the ideal approach to skin rejuvenation. It creates thousands of microscopic perforations, which induce immediate skin tightening and stimulate new collagen growth, improving the skin's texture and tone to fight fine lines and deep wrinkles, and even acne scars.

DOT Therapy also leaves the skin around each of the perforations intact, which allows the epidermis to heal from the edge of these tiny holes very rapidly, significantly improving overall complexion.

No Consumables

- Allows you to gain a cost advantage over other practices that install fractional systems requiring expensive consumables. Increase your profits!

Surgical and Fractional Uses

- Use for a range of applications in dermatology, plastic surgery and general surgery, including the treatment of skin tags and warts, and performing blepharoplasty. Increase return on investment!

Versatile Adjustable Parameters

- Tailor to your patient; tailor the downtime! Adjust treatment size, shape, order of DOT delivery, pulse duration, etc. Fully adaptable to your needs!
